Technical

Products & Services

1

▶ ICT Services

Our highly competent team of computer technicians provides a full range of computer services and maintenance tasks. Apart from cleaning, repairing, configuration and troubleshooting, we also provide user assistance and training for computer systems. We ensure that companies derive the most value from their computer systems by ensuring they work efficiently and are programmed for the users benefit

2

▶ Electricals, Metal Fabrication and Civil Works

Under this segment, we have a diverse team of professionally trained craftsmen and artisans. Through this portal we embark on civil works with the utmost confidence acknowledging the fact that we have a strong team that is able to plan and execute jobs in the allocated time-frame. Furthermore, we have a wide range of tools and machinery that make our work easier, faster and neater than most competitors in the market.

3

▶ Screening Breathalyzer And Safety Equipment

We supply a high-tech Breathalyzer with special features such as wide led lighting according to test results, calibration reminder, 5,000 Test results in memory, 65,000 test calibration interval, digital display of test results in % BAC or Mg/ or G/l, Replaceable / washable blow caps for hygienic use, 5,000 tests with one set of new alkaline batteries.

4

▶ Security CCTV, Fire and Intruder Alarm Kits Supply and Installations

Under this segment we supply and install security systems ranging from all CCTV components, access control devices, including intruder and fire alarm systems. We also provide service and maintenance of every system we supply and install on customer request.

5

► Property Maintenance

We offer maintenance services to property owners to relieve them of the stress of arranging skilled labour and tools. Our combined technical team ensures that all elements of the property are well taken care of and are in full working condition.

6

► Document Digitization

Under this segment we have a diverse team of professionally trained personnel. With this service and use of a state of the art scanning machine we are able to translate hard copy documents to soft copy documents that are indexed for ease of reference for the client and stored in a portable device for ease of reach unlike having to store or move with hard copy documents. Acknowledging the fact that we have a strong team that ensures that the work is executed timeously

7

► Network system: Design, Installation, Maintenance & Troubleshooting, Fibre Optic Technologies, Cabling & Splicing

This service involves the supply and installation of Local Area Networks and Wide Area Networks. These systems allow companies and organizations to connect their computer system and be able to share files, data and remote access to gadgets like printers and scanners. By virtue of having easy access to company data in real time, work becomes more efficient and convenient.

8

► Electric fencing Services, Gate automation, boom gates, turnstile and mantrap installation

MEIT offers supply and installation of electrical fencing that stands the test of time. Furthermore, we have a wide range of access automation systems for both private and public places and institutions. We pride ourselves of using only genuine products from worldly renowned brands and manufacturers.

Engineering

Civil, Construction, Electricals & Telecommmunications

Engineering is the Art/branch of science and technology concerned with design, building and use of engines, machines and structure to create. MEIT is able to deliver under this segment due to the fact that we have well trained professionals coupled with the right machinery and tools to ensure a perfect delivery exceeding customer expectations. Quality is of high importance to our team members. We are continually evaluating and improving the level of service we offer our clients to ensure the reputation for quality and delivery on which we pride ourselves is maintained and sustained. We are committed to delivering projects that are not just fit for purpose, but which exceed expectation in terms of quality. Our reputation for both the quality of our project management and finished projects is achieved through our proven quality management system. Our quality system is an intergral part of our companies management activity and is implemented through a comprehensive set of procedures and controls implemented to suite professional standards principles of Quality

Our Quality Management System Follows Six Basic Principles Of Quality

- Provides for long-term quality control through established processes and systems.
- Nurtures and guides our Quality Culture through its proven policies and procedures.
- Successfully identifies and controls the quality standard and quality of design as defined by our clients.
- Plans for Quality: Identifying measures of achieving the required quality, including construction methods, equipment, materials and personnel.
- Ensure for Quality: Encouraging all parties to “Work Together to Deliver the Best - First Time”
- Provides for a process of continuous improvement correcting any potential quality deficiencies that may arise.

We aim deliver all of our projects timely and target to deliver right at first basis.

- Increase of the R&D capacity of business partners, staffing their project teams with the highly qualified and exprienced research engineers of MEIT who add value and ensure the robustness and success of the research and technological development process.

KYC

Know Your Customer

What are KYC services? KYC stands for 'Know Your Customer.' These are services that enable companies that handle money or financial institutions to know their customers. It is more than a simple business practice; it is a set of legal regulations most often aimed at financial institutions and other businesses. Its main purpose is to make sure customers' activity is legitimate, and no identity fraud or money laundering is taking place. KYC itself could be seen as an umbrella term incorporating a variety of different practices and methods within it i.e.:

Know Your Business

● KYB (Know Your Business) is an offset of KYC that focuses on companies as a whole.

Customer Identification Program

● CIP (Customer Identification Program) is the basis of your KYC and sets out the main framework and guidelines for making sure your customers are who they claim they are.

Customer Due Diligence

- CDD (Customer Due Diligence) can be broken down into SCDD (Simplified Customer Due Diligence) and EDD (Enhanced Due Diligence). This is the process of taking data about a customer and finding out more in-depth information about them. EDD processes are usually triggered on higher risk / higher value transactions and individuals.

Electronic KYC

- eKYC (Electronic KYC) is simply utilizing digital tech and online services and data systems to improve KYC. Simply put, eKYC does the busy work a human would normally have to do, checking documents and data against government records and stored information concerning a customer. KYC Services are offered through: automated face verification and document reading AI, Video based KYC and optical character recognition. To choose the best KYC provider you must look at: the regulations that affect you, what experience you want your clients to have, who your clients are, which country your clients are in and lastly how your KYC fits your user journey. Additionally you must consider the service coverage, document coverage, relevant regulations, data storage facilities and integration and pricing respectively
